

Industry standard hex head ensures positive connection into nut-setters.

Thick washer face for added strength.

Quality non conductive Deks washer.

Top Grip thread securely hold the sheeting and prevents dimpling.

Upper shank protection removes burrs that may damage the EPDM washer, and helps protect the coating on the upper thread.

11TPI Thread for fast installation

The special thread profile provides superior withdrawal load over conventional threads

Special coating to reduce dust for a quicker clean-up process.

Specially design drill tip for fast non slip drilling and enable use in steel or timber base materials
